# Why Netfree?

- It's the only filter with a built in standard of kashrus that will not be compromised! <sup>\*1</sup>
- **Netfree** is recognised by TAG, Satmar, Viznitz, Belz, Ger and all Charedi kehillos <sup>\*2</sup> in E.Yisroel as the most secure filtering solution.
- Because of the unique features offered by this filter system, **Netfree** can afford to allow access to websites no other system can allow. At the same time it's the only filter that can be used for people or in environments with people (this could include children) with addiction/potential addiction problems. <sup>\*3</sup>
- Because of the way **Netfree** runs, it uses up very little system resources, it does not rely on the speed of your computer to decide what to filter.
- The way the program is built it does not conflict with antivirus and firewalls like some other filter programs do.
- **Netfree** has been going for 8 years has signed up over 130,000 users all over the world!
- The filter system is made and run by professional technicians who are Benei Torah, they are passionate, apart from giving a kosher service, to give the most affordable and professional service as well!

## How does it work?

- All pictures are checked in real-time by teams of non-jewish people in India before they are allowed to customers. (Including EBay, Amazon, Shutterstock, Pinterest, Google images). The criteria: no pictures of girls over the age of six are allowed at all! To date **Netfree** has filtered **over two billion pictures!**
- Websites are only allowed as a white-list, meaning only if the site is approved by Netfree is it allowed. At the moment they have a list of close to 600,000 sites! Even when **Netfree** approve the website, the text is

### **\*1Uncompromised Standards:**

A regular filter system, is only as kosher as those who make it. Even if those who produce the filter are frum, if those who are using it, are living on various standards of Yiddishkeit, this will affect the Kashrus of the filter. In fact even a filter system that is set up to be used by a lady (for clothing shopping), is automatically not kosher for men!

With Netfree there is no double standard, they will never allow the filter to be opened unfiltered, they will never allow forbidden sights, even temporarily.

Most filter systems, may allow temporary open access, or they may allow temporary/permanent clothing shopping unfiltered.

### **\*2 Recognised by TAG, Satmar..**

All the Kehillos mentioned use Netfree in a closed group (called a kehilla). Once again, the broader the spectrum of people the more problematic the internet is going to be.

censored in real-time as well as the pictures.

- Even videos are checked from end to end, **Netfree** has checked over 700,000 videos, covering the huge amount of topics. Nature, DIY, training programs, songs etc.
- In the event that a site must be allowed with unfiltered content this can be requested from Netfree's Vaad Rabbonim. They will never allow unfiltered clothing shopping.

**\*\*Using Netfree in an environment with people with addiction/potential addiction problems**

Although Netfree is very strict, the major drawback with Netfree is that it appears so safe that a person might allow a child to use it. THIS IS PROBLEMATIC. Once a child knows the convenience of the internet they may be tempted to use it in a library, shop or hotel.

Also Netfree sometimes make errors and allow things they shouldn't.

Many people are unaware of the other dangers of addiction /obsession & communicating with the wrong people.

The use of a computer at home is problematic especially in the light of the heavy video and gaming abuse going on even in the Hemishe kehillas

# Signing Up For Netfree

First find out whether Netfree is for you. Go to 414.co.il or 210.co.il, click on the tutorials link. Read up about the disadvantages and limitations when using Netfree. If you are still unsure whether Netfree will work for you, try installing it only on one computer and see how you manage with it.

Although the installation process is fairly simple, it's worth having the number of a Netfree technician on hand to help you through the steps if you get stuck. The number to call for E.Yisroel: 07-2277-2255 England: 020-3905-1900 United States: 718-400-8838.

**To sign up for Netfree** go to 414.co.il or 210.co.il, click on the tutorials link, then choose the option for joining netfree from the list (outside E.Yisroel choose the option "Join Netfree from outside Israel").

## Critical Information

It is critical to understand the process for requesting websites and reporting problems. Sometimes websites which you request will not work properly, either the pictures are not being checked or when you try to go to the payment page the page freezes etc. **MOST PROBLEMS like this can be resolved easily!** Netfree has an excellent tool to report problems. The reporting tool allows you to easily send a video recording of the problem which automatically will include a technical log of exactly what parts of the internet are being blocked at the same time.

Call Netfree technical support right after you have installed, explain to them that you are new user, and get them to show you how to make a website request **and** how to use **the reporting tool**. The number to call for E.Yisroel: 07-2277-2255 England: 020-3905-1900 United States: 718-400-8838. It may take you a number of attempts to understand how this reporting tool process works, however it is worth the effort!

The most affordable filter system

Netfree offers flexible plans:

**Gmail Only** 4ℳ (\$1.20 £1)

**Limited Plan** In this plan, only basic websites are open (for example: banks) 7ℳ (\$2.10 £1.60)

**Safety Plan** 10ℳ (\$3 £2.50) This plan blocks certain sites which are likely to have problems, for example addictive sites (including forums and news sites) or sites which have problematic hashkafos

**Most Open Plan** 30ℳ (\$8.80 £7.50)

**Usually if a customer keeps Netfree for a month he stays on for years.**

# What people are saying about Netfree

Some time ago **Netfree** was taken to court by another filtering company. They had to run an emergency online charity campaign. Within a very short time they collected the desired amount. From the comments the donors made it's clear, that for many of them their spiritual and even physical lives depend on this filter system!

Don't just take our word for it all the comments can be viewed at

[www.netfree.link/netfree-campaign](http://www.netfree.link/netfree-campaign)

I'm just, going to publish a few of the many comments that were left by the donors.

- ◇ *In your merit, we are working kosher! It's like Noah's Ark at the time of the Mabul!*
- ◇ *I was saved from forbidden sights in the merit of Netfree*
- ◇ *We moved over from another filter to Netfree, there is no comparison!*
- ◇ *Without Netfree I would not be able to do work*
- ◇ *A donation from a graphic artist who would quit if Netfree folds*
